MATH 1342 – Elementary Statistics – Week 3: Describing Categorical and Quantitative Variables

Sep 8 – 10 | 2.1 Categorical Variables • 2.2 One Quantitative Variable: Shape and Center | Fall 2026 · Section 036 · TTh 6:00–7:20 PM (DIL)

Module Objectives	Instructional Materials	Learning Activities	Assessments	Tools
1. Construct frequency and relative frequency tables, compute a sample proportion $\hat{p}$, and distinguish the parameter p from the statistic $\hat{p}$. (CLO 2) **2.** Compute and interpret overall and conditional proportions, and a difference in proportions, from a two-way table, choosing the correct denominator. (CLO 2) **3.** Interpret bar charts, pie charts, side-by-side bar charts, and segmented bar charts. (CLO 2)	e-Text: 2.1 Categorical Variables Interactive Lecture: 2.1 Categorical Variables Slides: 2.1 Categorical Variables	Participation: Frequency and Relative Frequency Participation: Finding Proportions from Two-Way Tables	Online Homework: 2.1 Categorical Variables (due Sun Sep 13, 11:59 PM)	WileyPLUS StatKey Blackboard Zoom (live class)
4. Describe the shape of a distribution (symmetric, left-skewed, right-skewed) from a dotplot or histogram. (CLO 2) **5.** Compute the mean and median of a dataset and explain how skewness and outliers affect each (resistance). (CLO 2) **6.** Interpret the standard deviation as the typical distance from the mean and apply the 95% rule to estimate the mean and standard deviation from a bell-shaped dotplot. (CLO 2)	e-Text: 2.2 One Quantitative Variable Interactive Lecture: 2.2 One Quantitative Variable Slides: 2.2 One Quantitative Variable	Participation: Quantitative Variables – shape, mean vs. median Estimation activity: estimate the mean and SD of a dotplot without calculating (95% rule)	Online Homework: 2.2 One Quantitative Variable (due Sun Sep 13, 11:59 PM)	WileyPLUS StatKey Blackboard Zoom (live class)

CLO 2 Recognize, examine, and interpret the basic principles of describing and presenting data.
