

MATH 1342 – Elementary Statistics – Week 3: Categorical Variables

Sep 7 – 9 | Labor Day – No Class (Mon Sep 7) • 2.1 Categorical Variables | Fall 2026 • Section 019 • MW 7:30–8:50 PM • RRC Room 8210

Course-level Objectives	Module-level Objectives	Learning Materials	#	Activities	#	Assessments	#
1. Interpret ideas of population versus sample, random variables, and techniques of descriptive statistics including frequency distributions, histograms, boxplots, and scatterplots. 6. Analyze data presented in two-way tables to provide information about relationships between categorical variables.	1. Construct frequency and relative frequency tables, compute a sample proportion $\hat{p}$, and distinguish the parameter p from the statistic $\hat{p}$. (CO1) 2. Compute and interpret overall and conditional proportions, and a difference in proportions, from a two-way table, choosing the correct denominator. (CO6) 3. Interpret bar charts, pie charts, side-by-side bar charts, and segmented bar charts.
